WORK EXPERIENCE

Gresham

04/2017 – 02/2026

Senior Business Analyst / Application Support Specialist • Full-time

Federal Reserve Bank of New York on-site

- Supported streaming market data application operating across Linux, Oracle, and AWS cloud infrastructure including release planning, and production readiness coordination.
- Developed actionable JIRA user stories with acceptance criteria from high-level Epics collaborating with Product Owner and Scrum Master.
- Provided production application support and troubleshooting coordination for business-critical financial market data systems across development, QA, and production environments.
- Streamlined QA, Production deployment processes in Linux client/server and Oracle environments.
- Coordinated software access, tooling, and infrastructure requests through ServiceNow change and support workflows.
- Coordinated cross-functional deployment activities between business users, infrastructure, database, and operations teams to ensure successful production releases.
- Prioritized functional, non-functional requirements from business, infrastructure, architecture into releases.
- Deployed releases through environments (Dev, QA, Prod) in coordination with system, database and operations support teams.
- Created and executed Pre-QA test plans for streaming price cleansing workflows and key functional items.
- Maintained operational runbooks, troubleshooting procedures, deployment documentation and support knowledge bases using Confluence and Visio.
- Executed deployment validation procedures, environment readiness testing, and post-release health checks.
- Parsed and analyzed large log datasets using shell scripting and Excel Power Query/Pivot tools to troubleshoot pricing and data load anomalies.
- Tested all deployment steps and scripts to ensure post-deployment environment readiness.
- Mapped legacy relational database pricing schema to REST API payload data format in JSON.
- Supported REST API integration efforts including JSON payload validation, API endpoint definition, and OpenAPI/Swagger documentation.
