Business Analyst

Hands-on application support and release coordination professional with experience supporting enterprise financial applications, fixed-income pricing platforms, streaming market data systems, and regulated production environments. Experienced coordinating production readiness, deployment validation, health checks, troubleshooting, runbooks, log analysis, REST/JSON validation, Oracle data comparison, and cross-functional issue resolution with DevOps, infrastructure, database, operations, QA, and development teams. Strong background in financial data platforms, application modernization, Linux-based environments, AWS-connected services, OpenShift exposure, and incident-oriented support practices.

WORK EXPERIENCE

Gresham Technologies

Application Support / DevOps Release Coordinator / Senior Business Analyst

04/2017 – 02/2026

New York, NY / On-site

- Supported enterprise financial applications delivering fixed-income pricing, reference data, and streaming market data across Linux, Oracle, OpenShift, and AWS-connected infrastructure.
- Validated REST API pricing payloads against Oracle data sources to support migration from legacy on-premise services to AWS-hosted microservices.
- Coordinated deployment readiness and production validation across Development, QA, UAT, and Production environments.
- Executed environment readiness testing, deployment validation, post-release health checks, and operational verification procedures.
- Maintained runbooks, deployment procedures, troubleshooting guides, validation checklists, implementation notes, and support documentation.
- Supported incident-oriented troubleshooting by coordinating log review, environment checks, data validation, escalation, and cross-team issue resolution.
- Partnered with enterprise architects and engineering teams to document cloud migration architecture and resiliency patterns for legacy AC Plus and OPS360-based services.
- Supported disaster recovery and resiliency readiness activities across primary, secondary, and cloud-connected service environments.
- Worked with DevOps, infrastructure, database, QA, operations, and development teams to support release execution and production stability.
- Coordinated software access, tooling, environment, and operational support requests through ServiceNow workflows.

EmblemHealth • AIG Property Casualty • AIG Travel Guard

Business Systems Analyst / Program Manager

01/2009 – 01/2016

New York, NY / Jersey City, NJ

- Supported HP PPM, portfolio management, approval workflow, reporting, and insurance business systems used by PMO and operational stakeholders.
- Coordinated UAT planning, test data setup, defect tracking, workflow validation, and signoff readiness for enterprise business applications.
- Supported configuration and testing of staffing profiles, allocation pools, stage-gate approvals, project generation, timesheet workflows, and reporting processes.
- Supported insurance premium/rating workflow validation and international travel product rollout activities.

Asset Control / Solomon Page • Capgemini / Fidelity Investments
Lead Consultant / Implementation Engineer

01/2006 – 01/2009
New York, NY / Boston, MA

- Supported ACPlus / Asset Control financial data management platform implementations involving reference data, pricing data, time series data, security master, and golden-copy workflows.
- Assisted pre-sales and post-sales teams by building proof-of-concept solutions demonstrating data normalization, consolidation, cleansing, and downstream distribution.
- Processed and validated financial ratings and fixed-income data feeds from Standard & Poor's, Moody's, Reuters, and internal Fidelity sources.

OpenPages • Thomson Reuters • PlanetCAD • Dassault Systèmes
Consulting Engineer / Senior Software Engineer / Software Engineer

01/1989 – 01/2005

- Configured SOX Express workflows for Sarbanes-Oxley Section 302/404 documentation, testing, approval, and compliance processes.
- Supported financial research and entitlement platform modernization using Java, XML, JSP/Servlet, and C#.
- Developed CAD/CAM and engineering automation solutions using CATIA, StoneRule, FORTRAN, C/C++, UNIX, AIX, Sun, IBM mainframe, and DB2.
- Delivered manufacturing, aerospace, automotive, and defense engineering solutions for clients including Hyundai Motor Company, General Dynamics Electric Boat, Sikorsky Aircraft, and Bell Helicopter.

EDUCATION

MS, Mechanical/Manufacturing Engineering

University of Massachusetts, Amherst

Amherst

BS, Mechanical Engineering

University of Massachusetts, Amherst

Amherst

Baccalaureat D, Mathematics and Science

Lycée Paul Éluard

France

SKILLS

Application Support, AWS, Bash, Confluence, Deployment Validation, Excel Power Query, Financial Data, Git, Health Checks, Incident Coordination, Jira, JSON, Korn Shell Scripting, Linux, Market Data, OpenAPI/Swagger, OpenShift exposure, Oracle, Pivot Tables, Postman, Production Readiness, Reference Data, REST API, Runbooks, ServiceNow, SQL, Visio

Production Support: deployment validation, health checks, incident coordination, operational readiness, runbooks

Application Support: downstream consumers, enterprise financial applications, fixed-income pricing, market data distribution

Technical Operations: AWS, JSON, Linux, OpenAPI/Swagger, OpenShift exposure, Oracle, REST APIs, ServiceNow

Data Validation: golden-copy workflows, Oracle comparison, pricing payload validation, reference data, security master

Delivery Support: Confluence, Dev/QA/UAT/Production handoffs, documentation, Jira, release coordination, Visio

Collaboration: database, development, DevOps, enterprise architects, infrastructure, operations, product owners, QA
