Business Analyst

Senior Business Analyst and Application Support professional with experience supporting enterprise financial applications, fixed-income market data ecosystems, insurance systems, financial data platforms, and regulated operational workflows. Proven track record gathering requirements, documenting workflows, coordinating QA/UAT, validating production releases, and partnering with business, operations, infrastructure, DevOps, database, and development teams. Experienced in application modernization, REST API validation, Oracle data mapping, release readiness, operational runbooks, ServiceNow workflows, and cross-functional delivery across financial services and insurance environments.

WORK EXPERIENCE

Gresham Technologies

04/2017 – 02/2026

Senior Business Analyst / Application Support / DevOps Release Coordinator

New York, NY

- Supported enterprise financial applications delivering fixed-income pricing, reference data, and streaming market data to downstream consumer platforms.
- Validated REST API pricing payloads against Oracle data sources during migration from legacy on-premise services to AWS-hosted microservices.
- Coordinated release readiness, deployment validation, and production cutover activities across Development, QA, UAT, and Production environments.
- Produced operational runbooks, deployment procedures, troubleshooting guides, validation checklists, and support documentation for mission-critical financial systems.
- Collaborated with Product Owners and Scrum Masters to decompose Epics into Jira user stories, acceptance criteria, and implementation-ready requirements.
- Partnered with enterprise architects and engineering teams to document cloud migration architecture for legacy AC Plus pricing services and AWS-hosted OPS360 microservices.
- Supported resiliency planning and disaster recovery readiness activities for primary, secondary, and cloud-connected service environments.
- Worked closely with QA, DevOps, database, infrastructure, operations, and development teams to support SDLC delivery and production stability.

Insurance Portfolio & Business Systems

01/2009 – 01/2016

Senior Business Analyst / Program Manager

New York, NY / Jersey City, NJ

- Supported insurance systems and PMO workflows across EmblemHealth, AIG Property Casualty, and AIG Travel Guard.
- Gathered and documented requirements for HP PPM portfolio management, demand/intake, approval workflows, reporting, and PMO governance processes.
- Configured and tested business-critical workflows including request creation, stage-gate approval, project generation, staffing profiles, allocation pools, timesheets, and approval notifications.
- Created representative UAT data using users, roles, resource managers, executives, financial data, and cost centers to validate real-world workflow scenarios.
- Supported Business Objects and Excel-based reporting for portfolio visibility, resource planning, productivity tracking, and operational decision-making.
- Analyzed and tested insurance premium/rating workflows using origin, destination, age, gender, duration, coverage limits, and university-mandated medical minimums.
- Coordinated rollout of travel insurance premium tables and certificate-of-insurance generation workflows for international markets including Korea, Australia, APAC, and the Middle East.

Financial Data Management Platforms
Lead Consultant / Implementation Engineer

01/2006 – 01/2009
New York, NY / Boston, MA

- Supported financial data platform work across Asset Control / Solomon Page and Capgemini / Fidelity Investments.
- Supported ACPlus / Asset Control financial data platform implementations involving reference data, pricing data, time series data, security master creation, and golden-copy data management.
- Built proof-of-concept solutions demonstrating normalization, consolidation, cleansing, and distribution of vendor data to downstream trading, portfolio management, regulatory, and risk platforms.
- Processed and validated financial ratings and fixed-income data feeds from vendors including Standard & Poor's, Moody's, Reuters, and internal Fidelity sources.

Governance, Engineering Software & CAD/CAM Solutions
Consulting Engineer / Software Engineer

01/1989 – 01/2005
France / New Jersey / Boston

- Supported governance and engineering software work across OpenPages, PlanetCAD, and Dassault Systèmes.
- Configured SOX Express workflows for Sarbanes-Oxley Section 302/404 documentation, testing, approval, and compliance processes.
- Developed and implemented CAD/CAM and engineering automation solutions using CATIA, StoneRule, FORTRAN, C/C++, UNIX, AIX, Sun, IBM mainframe, and DB2.
- Delivered manufacturing, aerospace, automotive, and defense engineering solutions for Hyundai Motor Company, General Dynamics Electric Boat, Sikorsky Aircraft, and Bell Helicopter.

EDUCATION

MS, Mechanical/Manufacturing Engineering

University of Massachusetts, Amherst

Amherst

BS, Mechanical Engineering

University of Massachusetts, Amherst

Amherst

Baccalaureat D, Mathematics and Science

Lycée Paul Éluard

France

SKILLS

Agile, Application Support, AWS, Business Analysis, Confluence, Excel Power Query, Financial Data, Git, HP PPM, Insurance Systems, Jira, JSON, Linux, Market Data, OpenAPI/Swagger, Oracle, Postman, Production Readiness, Reference Data, Release Coordination, Requirements Analysis, REST API, SDLC, ServiceNow, UAT, Visio, Workflow Analysis

Core Competencies: Application Support, Business Analysis, Financial Data Platforms, Financial Systems, Insurance Systems, Oracle Data Mapping, Production Readiness, QA/UAT, Release Coordination, REST API Validation, ServiceNow Workflows
