

Paul Lyu

Business Systems Analyst

Edgewater, NJ | 551-200-0709 | paulchlyu@gmail.com

Professional Summary

Results-oriented senior hybrid Business Analyst / Application Support / Delivery Coordination professional with insurance-industry, financial market data experience and strong operational technology background. Hands-on team player experienced in all phases of Software Development Life Cycle (SDLC) from business requirements to production releases using Agile methodologies.

Work Experience

Business Analyst - DevOps Release Coordinator

GRESHAM TECHNOLOGIES PLC | New York, NY

April 2017 to February 2026

Federal Reserve Bank of New York on-site:

- Supported streaming market data application operating across Linux, Oracle, and AWS cloud infrastructure including release planning, and production readiness coordination.
- Developed actionable JIRA user stories with acceptance criteria from high-level Epics collaborating with Product Owner and Scrum Master.
- Prioritized functional, non-functional requirements from business, infrastructure, architecture into releases.
- Created and executed Pre-QA test plans for streaming market data cleansing workflow.
- Maintained operational runbooks, troubleshooting procedures, deployment documentation and support knowledge bases using Confluence and Visio.
- Executed deployment validation procedures, environment readiness testing, and post release health checks.
- Parsed and analyzed large log datasets using shell scripting and Excel Power Query/Pivot tools to troubleshoot pricing and data load anomalies.
- Tested all deployment steps and scripts to ensure post-deployment environment readiness.
- Mapped legacy relational database pricing schema to RET API payload data format in JSON.
- Supported REST API integration efforts including JSON payload validation, API endpoint definition, and OpenAPI/Swagger documentation.
- Deployed releases through environments (Dev, QA, Prod) in coordination with system, database and operations support teams.
- Requested software tooling resources and installation requests via ServiceNow system tickets.

Senior Business Analyst

EmblemHealth | New York, NY

March 2014 to July 2016

Project Portfolio Management system (PPM)

- Documented Requirements, created and executed Test Plans for stakeholder sign off.
- Prepared PPM Resource Management module PPM RM rollout materials and provided training.
- Designed report metrics on performance, productivity and actual resource use.
- Developed use cases and test plans from requirements and lead UAT.
- Maintained portal web site with up-to-date Project Stage Gate templates.
- Developed comprehensive runbooks for PPM RM processes, standardizing procedures across 3 teams resulting in reduction of onboarding time.

Business Systems Analyst

Project & Portfolio Management | Jersey City, NJ

May 2012 to December 2013

AIG Property Casualty Program Management Office (AIG PC PMO) New York, NY

- Developed Requirements for HP PPM and Business Objects (BO) enhancement requests.
- Facilitated weekly status meetings to communicate priorities and to monitor progress.
- Liaised with home office, offshore development teams on requirements clarification and execution of UAT test plans.
- Published BO Quick Reference Guide documentation for Self Service Training.
- Monitored HP PPM and Business Objects (BO) environments proactively on a daily basis to identify and address recurring issues, reducing unplanned system outages by 18% over 12 months using automated alert tools and KPI dashboards.

Senior Program Manager/Business Analyst

AIG Travel, Inc | Jersey City, NJ

June 2009 to April 2012

Served as key liaison between profit centers, operations and systems (O&S) and distribution partners to manage requirements and to ensure timely and quality delivery. Responsible for APAC region - Korea, China, Australia and Middle East.

- Developed UAT test plan template for all phases of the SDLC.
- Managed enhancement requests to minimize cost implications and risks to project deliverables.
- Managed body of work supporting e-business operations.
- Deployed of global travel insurance through distribution channels and system enhancements.
- Liaised between profit centers, operations and systems and distribution partners.
- Conducted project closures: stakeholder feedback, gaps (expected delivery dates), lessons learned.

Solomon Page Technology Partners | New York, NY

February 2006 to October 2007

Asset Control Systems, NYC on-site:

- Re-designed the engineer's foundation toolkit for post sales consultants.
- Assisted clients during initial implementation phase of Price Capture project at JP Morgan Chase, TX.
- Developed a proof of concept reference & price data consolidation application for Asset Control Solutions team to demonstrate to clients.

Technical Support Services

OpenPages, Inc | Waltham, MA

April 2004 to December 2005

- Collaborated on customer-specific Sarbanes-Oxley SO Section 302 and 404 certification processes.
- Used SOX Express: the best J2EE-based SO Compliance Solution platform.
- Launched financial control compliance notification solutions with SOX-specific alerts.
- Enabled planning for downstream action items.

Senior Software Engineer

Thomson Financial, FirstCall / Central Database Technologies | Boston, MA

June 2001 to November 2002

Upgraded Thomson's JDBC/JSP/Servlet based entitlement system to be J2EE 1.2 compliant

* Re-engineered a set of existing FirstCall Research Host system functionality using Java, XML, C#

Software Engineer

PlanetCAD, Inc

January 1999 to June 2001

formerly Prescient Technologies, Inc) Boston, MA

- * Project lead for C/C++/XML/Motif/Java based CAD quality assessment tool on 4 UNIX platforms.
- * Leadership role in training, distribution of development tasks to contractors as well as integrating 3rd party deliverables back into the main code base.

Consulting Engineer

PlanetCAD, Inc | Boston, MA

February 1993 to June 2001

Lead pre/post sales implementations with international partners in Asia and Europe:

- Project lead for Mechanical Computer Aided Design (CAD)-quality assessment tool on four UNIX platforms.
- Application development lead for CAD Fasteners selection design modules implemented at Hyundai Motor Co., Sikorsky Aircraft, General Dynamics/Electric Boat.
- Training and distribution of tasks to contractors.
- Integrated third party libraries into product.

Software Engineer

Dassault Systemes | Paramus, NJ

August 1989 to August 1992

- Released the new Computer-Aided Design module (Sheet Metal Design) for IBM/Dassault.
- Developed software evaluation and testing procedures based on IBM quality software standards.
- Coordinated development tasks between teams in France and U.S. as an assignee in France.

Education

Mechanical Engineering (B.S.)

Univ. of Massachusetts | Amherst, MA

Manufacturing Engineering (M.S.)

Univ. of Massachusetts | Amherst, MA

Skills

Requirements maintenance **Data modeling** **Data analysis skills** - Data analysis experience (6-10 years)
Data analyst experience **Technical Proficiency** **System development architect experience** **Git**
Requirements gathering **Requirements design** **HP Project & Portfolio Management Center (PPM),**
Business Objects, Linux, Shell Scripting (Bsh, Ksh), Business Analysis, Java, Oracle, Sybase **Technical**
business analyst experience **Excel data analysis** **Business intelligence report generation** **Analysis**
(software development lifecycle)

Additional Information

-Trilingual: Korean, French, English

- Interpreter for NBC/Sports broadcasting during the 1988 Seoul Olympic Games.

- Attended High School in France with a Baccalaureat D diploma in Science and Mathematics.
