Senior Business Analyst | Enterprise Process & Software Delivery

Senior Business Analyst with extensive experience supporting enterprise financial systems, software delivery initiatives, and regulated operational workflows across banking and insurance environments. Proven track record leading stakeholder discussions, documenting complex business processes, coordinating SDLC activities, and translating operational requirements into implementation-ready artifacts for distributed engineering teams. Experienced in workflow analysis, UAT coordination, Agile delivery, release governance, operational documentation, and cross-functional collaboration across business, QA, infrastructure, DevOps, and production support teams.

WORK EXPERIENCE

Gresham

04/2017 – 02/2026

Senior Business Analyst | Financial Systems | SDLC Delivery • Full-time

Federal Reserve Bank of New York
on-site

- Supported enterprise streaming market data systems operating across Linux, Oracle, and AWS cloud infrastructure within a highly regulated financial environment.
- Led stakeholder discussions across business, operations, QA, infrastructure, and development teams to clarify workflow requirements, operational dependencies, release readiness criteria, and support procedures.
- Documented current-state operational workflows, deployment procedures, exception handling processes, escalation paths, and environment dependencies for mission-critical financial systems.
- Produced detailed operational documentation including deployment guides, troubleshooting procedures, validation checklists, process narratives, support runbooks, and knowledge base articles using Confluence and Visio.
- Collaborated with Product Owners and Scrum Masters to decompose Epics into detailed JIRA user stories, acceptance criteria, and implementation-ready requirements.
- Coordinated cross-functional SDLC activities between development, QA, infrastructure, database, operations, and business teams to support controlled production releases.
- Facilitated requirements clarification and issue resolution between business stakeholders and technical teams to reduce ambiguity and minimize delivery rework.
- Supported UAT readiness activities including test coordination, deployment validation, defect triage, release verification, and stakeholder signoff preparation.
- Executed deployment validation procedures, environment readiness testing, and post-release operational health checks across Dev, QA, and Production environments.
- Created workflow diagrams, operational process maps, deployment flow documentation, and support procedures using Visio and Confluence.
- Maintained authoritative documentation sets that evolved continuously as operational processes and system integrations changed.
- Coordinated software access requests, environment changes, and operational support workflows through ServiceNow governance processes.
- Parsed and analyzed large log datasets using shell scripting and Excel Power Query/Pivot tools to troubleshoot pricing anomalies and operational issues.
- Supported system integration and operational data validation efforts including JSON payload validation and endpoint documentation coordination.

EmblemHealth / EPMO Operations
Senior Business Analyst • Full-time

03/2014 – 07/2016

- Led requirements gathering, workflow analysis, and stakeholder validation activities for enterprise PMO operational initiatives.
- Documented business requirements, operational procedures, and test plans supporting stakeholder review and formal signoff processes.
- Facilitated UAT coordination, test execution, defect tracking, and business validation activities.
- Developed process documentation, operational training materials, and PMO governance workflows.
- Designed reporting metrics supporting resource planning, productivity tracking, and operational visibility.
- Maintained enterprise project portal documentation including project lifecycle templates, governance standards, and process artifacts.
- Supported workflow re-alignment initiatives to improve operational efficiency and funding approval processes.

AIG Property Casualty PMO
Business Systems Analyst • Full-time

05/2012 – 12/2013

- Developed detailed business and functional requirements for HP PPM and Business Objects enhancement initiatives.
- Facilitated stakeholder meetings to review priorities, clarify requirements, resolve ambiguities, and track delivery progress.
- Collaborated with distributed onshore/offshore engineering teams on requirements clarification, workflow validation, UAT coordination, and delivery readiness activities.
- Produced operational documentation and Business Objects Quick Reference Guides supporting self-service user training.

AIG Travel Guard Worldwide
Senior Program Manager • Full-time

06/2009 – 04/2012
Jersey City, NJ

- Supported enterprise e-business operations and SDLC coordination activities for global travel insurance platforms.
- Developed standardized UAT planning templates and operational testing procedures supporting enterprise delivery governance.
- Managed enhancement requests, delivery coordination, and operational readiness activities to minimize implementation risk and delivery impacts.
- Coordinated communication between business stakeholders, operations teams, technology groups, and external distribution partners.
- Conducted project closure activities including lessons learned reviews, delivery gap analysis, and stakeholder feedback sessions.

Capgemini
Lead Consultant • Full-time

10/2007 – 04/2009
Fidelity Investments Boston, MA on-site

- Supported enterprise investment data platform upgrade initiatives involving operational workflow coordination and vendor data integration processes.
- Processed and validated financial vendor feeds including Standard & Poor's, Moody's, Reuters, and internal fixed income market data.

Solomon Page
Implementation Engineer • Full-time

02/2006 – 10/2007
Asset Control New York

- Supported enterprise financial data implementation initiatives and operational onboarding activities for client delivery engagements.
- Assisted financial clients during implementation and workflow transition activities for enterprise pricing and reference data systems.
- Prototyped reference and pricing consolidation solutions supporting operational data integration efforts.

- OpenPages, Inc** 04/2004 – 12/2005
Consulting Engineer • Full-time
- Supported Sarbanes-Oxley compliance workflow initiatives and financial controls process implementations for enterprise clients.
 - Coordinated operational notification workflows, compliance-related process activities, and downstream action tracking procedures.
- Thomson Reuters** 06/2001 – 11/2002
Senior Software Engineer • Full-time
- Supported financial research and entitlement platform modernization initiatives within enterprise publishing environments.
 - Re-engineered legacy system functionality using Java, XML, JSP/Servlet, and C# technologies.
- PlanetCAD** 02/1993 – 06/2001
Senior Software / Consulting Engineer • Full-time Boston, MA
- Led software development and customer implementation activities across multiple UNIX platform environments.
 - Coordinated development tasks, technical integration activities, and contractor deliverables across distributed teams.
- Dassault Systèmes** 08/1989 – 08/1992
Software Engineer • Full-time Suresnes, France and Paramus, NJ
- Coordinated development activities between engineering teams in France and the United States for enterprise CAD software releases.
 - Developed software evaluation and quality assurance procedures aligned with IBM software quality standards.
- NBC Sports** 05/1988 – 10/1988
Interpreter for 1988 Seoul Summer Olympic games for NBC Sports broadcasting • Freelancer Seoul, South Korea

EDUCATION

- MS, Mechanical/Manufacturing Engineering** 09/1985 – 09/1988
 University of Massachusetts, Amherst
- BS, Mechanical Engineering** 01/1981 – 01/1985
 University of Massachusetts Amherst
- Baccalaureat D, mathematics and science** France • 09/1978 – 08/1981
 Lycee Paul Eluard, France

PUBLICATIONS

- Rules for an Expert Fixturing System on a CAD Screen using Flexible Fixtures** 03/1990
 Journal of Intelligent Manufacturing
- A Framework for a Rule-based Expert Fixturing System for Face Milling Surfaces on a CAD system using Flexible Fixtures** 03/1989
 Journal of Manufacturing Systems

SKILLS

plantuml, Business Analysis, Requirements Analysis, Workflow Analysis, SDLC, Agile, Jira, Confluence, Visio, UAT Coordination, Stakeholder Management, Process Documentation, ServiceNow, SharePoint, Oracle, Linux, AWS, git

Languages: English (Native or Bilingual), Korean (Professional Working), French (Professional Working)
